SNAMS 2024

Social network analysis is the study of relationships between social entities, a field significantly enriched by the recent advances in internet technologies and social media platforms such as Facebook, Twitter, and LinkedIn. These platforms offer unprecedented opportunities for individuals to connect, communicate, and share their perspectives on a vast array of topics. The dynamic and ever-evolving nature of social networks, coupled with the massive scale of user participation, poses significant challenges for researchers, particularly in data mining and machine learning. The International Conference on Social Networks Analysis, Management and Security (SNAMS-2024) aims to provide a comprehensive forum for researchers, practitioners, and industry experts to present and discuss their latest findings and innovations in the realm of social network analysis. This conference seeks to explore the vast opportunities in social networks, addressing both theoretical and practical challenges. SNAMS-2024 is dedicated to fostering an environment where students, scientists, engineers, and researchers can exchange ideas, present novel research contributions, and share experiences across all facets of social networks. We invite original research contributions in a wide range of topics, including but not limited to:

- Data mining and machine learning techniques for social networks
- Social network dynamics and evolution
- Security, privacy, and trust in social networks
- Analysis of social media content and trends
- Impact of social networks on society and human behavior
- Network visualization and big data analytics
- Applications of social network analysis in various domains (e.g., marketing, healthcare, education)
- Algorithms and models for social network analysis
- Sentiment analysis and opinion mining in social media
- Influence and information propagation in social networks
- Industrial applications of social network analysis
- Big data technologies for social network analysis
- Cloud and edge analytics for social networks
- Semantic analysis and knowledge graphs in social networks
- Business intelligence and decision-making based on social network data
- Ethical issues and governance in social network analysis
- Real-time and streaming analytics for social networks
- Case studies and best practices in social network management
- Integration of social network analysis with IoT and smart environments
- Fakenews detection
- Bots and social media
- Artificial Intelligence and Machine Learning for Social Networks Analysis

Important Dates

Submission Date: 30 August 2024

Notification to Authors: 20 October 2024

Camera Ready Submission: 30 October 2024

Gran Canaria, Spain. Dec 9-11, 2024

[Submission link, Click Here](#)

1- A full paper 6-8 pages

2- Short papers 3- 4 pages

3- Extended abstract: 2 Pages

4- Abstract: (500 words)

SNAMS 2024 General Co-Chairs:

Ghaleb Awad El Refae,
Univeirst of Al-Ain, UAE

Christian Guetl,

Graz University of Technology, Graz, Austria

Paolo Ceravolo,

SESAR Lab, Università degli Studi di Milano, Italy

STAFFORDSHIRE
UNIVERSITY SSAICS

UNIVERSITAT
POLITÈCNICA
DE VALÈNCIA

ULPGC

LLMs and Social Network Analysis:

Applications of LLMs in Social Network Analysis
 LLM-based Sentiment Analysis in Social Media
 Fake News Detection with LLMs.
 Privacy and Ethical Considerations in Using LLMs
 Enhancing User Experience in Social Networks with LLMs
 Cross-lingual Social Media Analysis with LLMs
 Dynamic Topic Modeling in Social Networks with LLMs
 LLM-driven Community Detection and Analysis
 Cultural and Societal Impact of LLMs on Social Networks.

Multimodal AI for Social Network Analysis

Integrating Multimodal AI in Social Network Analysis
 Multimodal Sentiment Analysis on Social Media
 Cross-modal Fake News Detection
 Privacy and Security in Multimodal Social Network Data
 User Behavior Analysis with Multimodal Data
 Multimodal Content Generation and Personalization
 Emotion and Sentiment Recognition from Multimodal Data
 Social Event Detection with Multimodal AI
 Bias and Fairness in Multimodal AI Systems
 Real-time Multimodal Data Processing for Social Networks

SYSTEMS & INFRASTRUCTURE

Systems and algorithms for social search
 Infrastructure support for social networks and systems
 Dynamics and evolution patterns of large and complex networks
 Social properties in systems design
 Learnings from operational social networks
 Data Collection
 Big Data and Social Paradigms

ALGORITHMS AND MODELS

Deep Learning and Knowledge Discovery.
 Measurement and analysis of social and crowdsourcing systems
 Benchmarking, modelling, performance and workload characterization
 Modelling Social Networks and behavior
 Management of social network data
 Streaming algorithms for social data
 Knowledge and innovation networks
 Methods for social and media analysis
 Models for network data
 Network analysis in human and social sciences
 Information propagation and assimilation in social networks
 Data mining and machine learning in social systems

APPLICATIONS

Novel social applications and systems
 Transient OSNs (e.g. Snapchat)
 Special purpose OSNs (e.g., Instagram, Vine)
 Communities in social networks
 Collaboration networks
 New models of advertising and monetization in social networks
 Mobile advertising on OSNs
 Network visualization
 Social networks and online education
 Sentiment analysis on OSNs
 Multilingual social networks
 Social networks as agents of societal change

PRIVACY & SECURITY

Privacy and security in social systems
 Trust and reputations in social systems
 Detection, analysis, prevention of spam, phishing, and misbehavior in social systems
