The Beauty and Joy of Computing

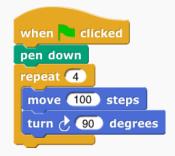

A creative and engaging start to learning computer science

What is BJC?

BJC is an introductory computer science curriculum for high school or college students. BJC emphasizes the joy and complexity of creating visual computer programs and applications. BJC is balanced with critical reflection on the impacts of new computing technology. BJC is an AP® Computer Science Principles course supported by the NSF and endorsed by the College Board and code.org.

Snap!, a Visual Programming Language

BJC uses Snap! (based on Scratch), one of the friendliest programming languages. It is purely graphical, which means programming involves simply dragging blocks around, and building

bigger blocks out of smaller blocks. Snap! features first class lists and first class procedures. These capabilities make Snap! suitable for a serious introduction to computer science for high school or college students.

BJC Outreach

BJC is in 200+ high schools across the US and in Europe, Australia and Asia. BJC has been adopted by TEALS nationwide and the New York City Department of Education, the largest school district in the country. BJC is taken by thousands of students online through edX.

BJC Curriculum

BJC follows the CS Principles framework with a programming-heavy focus and deep exploration into the social implications of computing.

Topics: The Big Ideas of Computing

Creativity, Abstraction, Data and Information, Algorithms, Higher-Order Functions, Recursion, the Internet, Global Impact of Computing (privacy, copyright, cybersecurity, censorship)

- All course materials are free.
- Project-centric creativity and design thinking.
- Collaboration and pair programming.
- Culturally relevant topics.
- Pacing guides, online resources, shared course materials for teachers.
- Also available on edX for classroom use.

Professional Development

We offer a 3-week PD for middle and high school teachers from all backgrounds (no prior CS experience necessary). Teachers whose school will commit to offer BJC the following year are encouraged to attend. Sign up now at contact@bjc.berkeley.edu!

Learn to Code & Become an AP CS Principles Teacher!

Why learn to teach BJC?

- You'll teach rigorous yet accessible content approved by the College Board as an Advanced Placement (AP) Computer Science Principles (CSP) course.
- No Computer Science experience required for teachers or students.
- BJC professional development provides 40 hours of face-to-face support and flexible online learning before the face-to-face week. We provide a certificate of completion for 60 CEUs.
- The Snap! visual programming language and research-based curriculum prepare students for the new AP CSP exam, however attendees are not required to offer BJC as an AP course.
- BJC is designed to attract a broad population of students, including females and underrepresented minorities, balancing programming and social implications.

How can I sign up?

- Certified high school teachers and supporters in all disciplines are eligible bjc.link/pdelig17
- Complete the principal approval letter at bjc.link/principalform17 and upload it with your application at bjc.link/pdapp17
- U.S. public school teachers may fundraise for tuition and an optional stipend on DonorsChoose (bjc.link/dchoose17). There is a 1-1 match by Infosys as long as funds last, so post your project soon!
- Pay tuition of \$2,000. See our cost breakdown at bjc.link/pdcost17

2017 PD Palooza	PD Fully Funded by Infosys
July 17 – 21	BJC PD Palooza – San Francisco State University, San Francisco, CA
2017 Dates	Self or DonorsChoose Funded Regional PD
Jun 26 – 30	Charleston, SC – The Citadel
Jul 10 – 14	Claremont, CA – Harvey Mudd College Highland Heights, KY – Northern Kentucky University
July 24 – 28	Denver, CO – Colorado School of Mines Torrance, CA – El Camino College (Los Angeles) Philadelphia, PA – Temple University Fairfax, VA – George Mason University
July 31 – Aug 5	Union, NJ – Kean University (NYC)
Aug 7 – 11	Loudonville, NY – Siena College (Albany)
